What's Possible with Klover

Klover delivers field carpentry solutions that help projects move faster, improve coordination, and maintain execution quality across every stage of construction. Our experienced field teams work seamlessly alongside prefabrication operations to **solve challenges in real time while supporting aggressive project schedules.**

For developers, architects, engineers, and contractors facing labor shortages, complex site conditions, and compressed timelines, **Klover provides scalable field carpentry solutions designed to improve efficiency, reduce delays, and keep projects moving forward with greater certainty.**

From interior framing and drywall systems to exterior envelope support and finish carpentry, our teams bring the experience, coordination, and craftsmanship required to **execute complex commercial construction projects safely and efficiently.**

By combining BIM-driven coordination, prefabrication expertise, and experienced field execution teams, Klover delivers smarter infrastructure solutions that improve sequencing, reduce onsite bottlenecks, and support predictable project outcomes.

Project Name:

One Thousand One

Why it matters:

Large-scale multifamily prefabrication helping accelerate enclosure, improve sequencing, and support high-density urban construction with greater certainty.

Project Name:

St. Luke's Monroe Hospital

Why it matters:

Integrated prefab and field execution helping streamline healthcare construction schedules while improving quality control and jobsite efficiency.

Project Name:

Piazza Alta

Why it matters:

Creative prefabricated solutions supporting complex mixed-use residential construction while reducing onsite congestion and accelerating floor-to-floor progress.
