What's Possible with Klover

Klover delivers creative prefabricated solutions backed by experienced panel installation teams that help projects move faster, reduce complexity, and improve execution certainty in the field. **From coordination through final placement, we ensure prefabricated systems are installed efficiently, accurately, and at scale.**

For developers, architects, engineers, and contractors navigating aggressive schedules and complex project demands, Klover provides integrated installation solutions designed to **streamline sequencing, reduce onsite congestion, and accelerate the path to enclosure.**

Our field installation teams work seamlessly alongside prefabrication operations to **support faster dry-in, tighter coordination, and more predictable project outcomes** while maintaining the highest standards of safety and quality.

By combining BIM-driven coordination, advanced manufacturing, and experienced installation expertise, **Klover delivers smarter infrastructure solutions** that improve efficiency from fabrication through final installation.

Project Name:

One Thousand One

Why it matters:

Large-scale multifamily prefabrication helping accelerate enclosure, improve sequencing, and support high-density urban construction with greater certainty.

Project Name:

St. Luke's Monroe Hospital

Why it matters:

Integrated prefab and field execution helping streamline healthcare construction schedules while improving quality control and jobsite efficiency.

Project Name:

Piazza Alta

Why it matters:

Creative prefabricated solutions supporting complex mixed-use residential construction while reducing onsite congestion and accelerating floor-to-floor progress.
