What's Possible with Klover

Klover delivers project management solutions that help complex construction projects move faster, reduce risk, and improve coordination from preconstruction through final installation. Our teams work as **strategic partners helping developers, architects, engineers, and contractors navigate modern construction challenges** with greater clarity and confidence.

For projects operating under aggressive schedules, labor constraints, and evolving site conditions, **Klover provides experienced project leadership focused on maintaining momentum, improving communication, and driving predictable execution across every phase.**

From BIM coordination and logistics planning to sequencing, scheduling, and field collaboration, our integrated approach helps eliminate bottlenecks, streamline workflows, and accelerate the path to completion.

By combining prefabrication expertise, advanced coordination, and experienced field execution, **Klover delivers smarter infrastructure solutions that improve efficiency, strengthen collaboration, and support successful project outcomes at scale.**

Project Name:

One Thousand One

Why it matters:

Large-scale multifamily prefabrication helping accelerate enclosure, improve sequencing, and support high-density urban construction with greater certainty.

Project Name:

St. Luke's Monroe Hospital

Why it matters:

Integrated prefab and field execution helping streamline healthcare construction schedules while improving quality control and jobsite efficiency.

Project Name:

Piazza Alta

Why it matters:

Creative prefabricated solutions supporting complex mixed-use residential construction while reducing onsite congestion and accelerating floor-to-floor progress.
